

# Week 7 Assignment

***Week 7 assignment is due end of day on Sunday March 15<sup>th</sup>. We'll look together at some of the most interesting student solutions in our office hours on Wednesday March 18<sup>th</sup>.***

You're strongly encouraged to go through the provided hands on labs before attempting this assignment. You may work in a small group. You don't need to write any code for this week's assignment!

○

*Your task is to first identify an existing report. A scanned paper report, a spreadsheet, something you make up and mockup yourself, or source from the web, any of these are acceptable. Your deliverable is a copy of the report, along with answers to the following questions:*

- 1. Who is (or seems to be) the intended audience for this report?*
- 2. How will the report user benefit from the information in the report? For example, what decisions might be made differently based on the data in the report.*
- 3. Create a dimensional model and describe the dimensions, levels, and measures based on the data in the report.*
- 4. How might you extend the report to make it more useful?*
