Week 2 Assignment

Week 2 assignment is due end of day on Sunday February 8th*. You may work in a small group on the assignment.*

Please use the tables in the `flights` database. Your deliverable should include the SQL queries that you write in support of your conclusions.

We'll look together at some of the most interesting student solutions in our office hours on Wednesday February 11th.

1. Which destination in the flights database is the furthest distance away, based on information in the flights table. Show the SQL query(s) that support your conclusion.
2. What are the different numbers of engines in the planes table? For each number of engines, which aircraft have the most number of seats? Show the SQL statement(s) that support your result.
